

## REAL-TIME COMMUNICATION AT ZODIAC AEROSPACE

In today's digital world, organisations need to gather and analyse data in real time, present insights faster and command processes with speed and agility using capabilities such as cloud, mobility, visualisation, artificial intelligence, edge and enterprise integration. They must also merge operations with information technologies and seamlessly integrate cutting-edge innovation with legacy systems and data. That's a lot to ask of a single solution. Or is it?

Discover Xalt, which streamlines daily operations and boosts efficiency across key business activities in all vital industries. Xalt technology accelerates digital transformation by enabling the convergence of the physical world with the digital world. It delivers a secure and nimble framework for custom apps that are native iOS and Android-ready with zero client footprint and no coding required. With apps powered by Xalt, you get optimal workflows, unprecedented insight and enhanced productivity.

### ABOUT THE CUSTOMER

Founded in Plaisir, France in 1896, Zodiac Aerospace supplies systems and equipment for the aerospace industry. The company provides equipment for commercial, regional and business aircrafts as well as helicopters and spacecrafts.

Isamin Armendariz is an application support specialist at Zodiac Aerospace for its U.S. seating division. In this role, she supports and develops applications, analyses data and creates reports.

She was first introduced to Xalt through CISTECH, a partner of Hexagon that has completed integration work for Zodiac Aerospace.

### APPS USED

*"We spent most of our time completing manual communication with suppliers, exchanging endless emails, phone calls and text messages from our suppliers to our buyers and vice versa," said Armendariz.*

*"We were sending manual Open Order reports to suppliers and lacked 'live' communication. Sometimes we had emails sitting for two days with no response because they were buried with so many other emails."*

## RESULTS

*"The first impression on the Zodiac side was 'wow,' this will solve all of our problems! Even though it did not fix all our problems, we are constantly using apps powered by Xalt to continue pushing improvements and facilitate the communication between our supplier base. It has been extremely useful and we believe it will continue to be," said Armendariz.*

Zodiac Aerospace currently has over 200 employees using Xalt's cloud and mobile capabilities, mainly in procurement, shipping and quality.

## BENEFITS

***"We have reduced a significant amount of time on manual communication processes," said Armendariz. "We are experiencing faster responses from our supplier and our suppliers have more autonomy."***
